Re: VMRC #14-0343

Dear Ms. ~~Gillam~~ *Seay*

We have received an application submitted by James River Water Authority requesting authorization to install a raw water intake in the James River, at N37-44.966, W78-10.1833, near the Town of Columbia, and a water line beneath the Rivanna River, at W78-10.1833, W78-10.6000, to meet water demands for Fluvanna and Louisa County.

I am the owner of Point of Fork
Your name was given as an adjacent property owner, therefore, we are advising you of this project. Attached please find a copy of the drawings indicating the project details.

If you have any questions about this project, please contact me at (757) 247-2251. If I cannot answer your questions, I may need to refer you to the applicant or agent.

If we do not hear from you by May 19, 2015, we will assume that you have no objections to the project.

Sincerely,

[Signature]

for Randal D. Owen
Environmental Engineer

Yes, I do object to this project as my land is very historically noteworthy:
① On John Smith's map up the James where the James and Rivanna

RDO/lra meet

HM

Enclosure

cc: Applicant
Agent

② *Capitol City of the Monacan Indians.*

③ *Depleting the water at any juncture will have massive impact on the river's natural flow, wild life/aquatic species and uplift/subsidence/erosion of the surrounding land!*
④ *The Rivanna River was designated the first scenic River in Virginia in 1974 and later an American Treasure by Save America's Treasures Program.*

Subject: Waterfront Construction Permit Approval for VB14-205, Proposed Breakwater for Eric Olson at 3171 Inlet Road

#14-1520

Dear Mr. McCoy:

The referenced application has been reviewed and approved with the following conditions:

1. **Prior to the issuance of a building permit, this proposed project must comply with the Stormwater Management Ordinance.** Please contact the Development Services Center at 757 385-8277 regarding the need to submit a Stormwater Management Plan, or an "Agreement in Lieu of a Plan".

The Development Services Center has indicated, in order to utilize the Agreement in Lieu of a Stormwater Management Plan provision, the property owner must agree to the conditions in the agreement, and the following note must be placed on the face of the waterfront construction site plan:

"The complete provisions for a Stormwater Management Plan as required by the Stormwater Management Ordinance are not shown on this plan. The Permittee has chosen to utilize the Agreement in Lieu of a Stormwater Management Plan." If shown on the waterfront construction plans "the location, types, and sizes of proposed permanent stormwater management controls are shown on this plan for inspection purposes only."

You may view or download the agreement at:

<http://www.vbgov.com/government/departments/planning/DSC/Documents/20140701-PLN-DSC-Agreement%20in%20Lieu%20of%20a%20SWM%20Plan.pdf>

2. A silt fence shall be properly installed and maintained seaward of all disturbed areas at the conclusion of each workday and will remain until the site has been stabilized.
3. Within 30 days of completion of the project, the contractor or property owner shall have engineer of record complete and return the enclosed Engineer's Final Inspection Report.
4. This approval will expire one year from the date of this letter. If the project has not been completed by that time, it will be necessary to reapply to continue the project. Contact this office if this situation occurs.

Olson

5. **An on-site pre-construction meeting will be required for this project.** The contractor must contact our office at 385-8246 to schedule the pre-construction meeting, 48-hours prior to mobilizing equipment or materials to the site and prior any site work or beginning construction.

You can obtain the approved waterfront construction drawings dated December 26, 2014, sheets 1 through 2, from Room 115 of the Planning Department. You **must** bring a copy of this letter to the Planning Department's Room 115 to obtain the approved plans from the reception staff. You will then be directed to the Permits and Inspections Office for issuance of the required building permit.

The Permits and Inspections office is located in Building 2, Room 100, at 2405 Courthouse Drive. You may contact the Permits and Inspections office at (757) 385-4211, concerning the cost of the building permit.

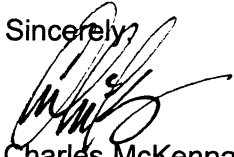

Be advised that no disturbance or construction may commence until after the required building permit has been obtained and appropriately displayed on site. Any changes to the project must first be shown on revised drawings, the drawings resealed by the engineer of record, and re-submitted to the Virginia Marine Resource Commission for consideration of approval. Field changes are not allowed.

Prior to commencing construction, you may also need a permit from the following agencies:

1. U.S. Army Corps of Engineers, 803 Front Street, Norfolk, Virginia 23510
2. Virginia Marine Resource Commission, Habitat Management Division, 2600 Washington Avenue, Newport News, Virginia 23607-0756

If you have any questions, call (757) 385-8246.

Sincerely,

Charles McKenna
Coastal Zone Inspector
